

VIPP900

V3 Kitchen

PRODUCT DESCRIPTION

The V3 kitchen introduces the next step in Vipp's legacy of metalwork and brings a distinct character to its familiar modular design. The freestanding modules are wrapped in naturally anodized aluminium with vertically extruded profiles curving around the edges to bring a light elegance to the metallic appearance.

KEY SELLING POINTS

ONE DESIGN, FOUR MODULES

A Vipp kitchen is a modular concept. We think of it as building blocks. There are four types of modules; island, narrow island, wall and tall. Each module can be built with predefined units of your choice. A full large dishwasher is available when choosing either the island module or wall module.

DURABILITY

As a testament to quality, we offer a ten-year warranty on the kitchen.

EXTRUDED ALUMINIUM

The V3 kitchen introduces one of our trademark materials – extruded aluminium. Vertically extruded profiles curving around the edges bring a light elegance to the metallic appearance. The Vipp V3 kitchen is made in naturally raw anodized aluminium.

RAISED ON LEGS

Inspired by furniture, the Vipp kitchen is raised on legs, adding extra functionality with easy access to cleaning. Set screws in stainless steel let you adapt the kitchen to uneven floors.

PRODUCT DETAILS

VIPP900
V3 Kitchen

FEATURES

SINK AND KITCHEN TAP For an uninterrupted expression the stainless steel table top features an integrated sink available in two sizes with Vipp kitchen tap in stainless steel.

PULL-OUT NOZZLE The Vipp tap is designed with a pull-out nozzle for an easy sink clean-up. Grooves in the stainless steel are both a functional means for a firm grip when hands are wet while also being an aesthetic design detail.

HANDLES The kitchen cabinets come with discreetly integrated handles, while fridge and freezer cabinets feature long handles with rounded, rubber inner edges that can manage the weight and pressure of the heavier, air-sealed doors.

VIPP900
V3 Kitchen

FEATURES

DRAWERS Careful detailing adds extra function to the drawers of the Vipp kitchen. The sides of all drawers are fitted with silicone profiles to protect delicate items.

SECTION INSERT Larger drawers are fitted with a non-slip removable mat. In the unit with two large drawers, one features a cross to create four smaller storage sections.

CANISTERS & INSERT A storage solution for dry foods comes in the form of an insert with sixteen holes tailored to fit the two-sized Vipp canisters. The canisters are made in 1.5 mm glass, the canisters are fitted with a transparent rubber ring for a proper seal to give the contents a long shelf life. The canisters come in two sizes, 0.9 ml or 1.7 ml and can be bought individually.

VIPP900
V3 Kitchen

FEATURES

CUTLERY INSERT The first shallow drawer is fitted with a soft silicone insert of seven compartments to neatly organize cutlery.

UTENSILS AND KNIFE INSERT The second shallow drawer is fitted with an insert tailored to kitchen utensils including knives.

CABINET SHELVES Steel-covered shelves in the cabinets echo the industrial design expression of the V3 kitchen.

V3 Kitchen

FEATURES

CAREFULLY CONSIDERED DETAILS

Store away your dishwashing brush under the sink until next use. The inside of the kitchen cabinet door features a rack, a hook, and a tray for excess water.

SORT YOUR TRASH Integrating a sustainable waste assortment solution in the Vipp kitchen, a deep drawer with five removable custom-made compartments makes sorting your trash an easy task.

BROOM AND DUST A removable back plate below the sink hides the plumbing and is mounted with a Vipp broom and dustpan set.

VIPP900
V3 Kitchen

FEATURES

ROUNDED EDGES The edges of the stainless-steel countertop and aluminium siding of the V3 kitchen are rounded for a soft take on the industrial material.

POWER OUTLET The integrated power outlets add flexibility when cooking in the kitchen. The power outlet is available in a broad variety of international versions.

VIPP900
V3 Kitchen

FEATURES

INDUCTION Opt for a flush mounted induction solution smoothly integrated into the steel worktop - with or without downdraft ventilation.

GAS Choose between three or five gas hobs floating seamlessly on the worktop next to gas knobs designed by Vipp.

OVEN Touch-to-open, rendering the handle obsolete for a streamlined aesthetic.

VIPP900
V3 Kitchen

FEATURES

STORAGE OPTIONS Opt for either two cabinets or four large drawers underneath the large induction. Featured here is the cabinet solution with steel-covered shelves.

VIPP17 PEDAL BIN A bestseller for the kitchen, the largest of the of the five-sized pedal bin holds 30 litres / 8 gal of rubbish and comes with customised bin liners.

PRODUCT CHARACTERISTICS
& MAINTENANCE

CHARACTERISTICS

The new V3 kitchen is designed on the shoulders of Vipp’s original V1 kitchen. Despite sharing the same overall principles of V1, V3 deviates from the industrial look of black powder-coated steel and ventures in a new direction. The new V3 kitchen allowed us to combine valuable knowhow from our first kitchen with our legacy of metalwork in a visual expression that is both very compelling and innovative. In addition to the functional nature of the modular kitchen, we were able to introduce one of our trademark materials – extruded aluminium.

With Vipp’s legacy of metalwork revolving mainly around steel, the V3 introduces a fresh take with its light, aluminium-first appearance. Inspired by the material’s use in Vipp’s Chimney House and Shelter guest-houses, the elegant aluminium siding and rounded edges offer a unique aesthetic, while the underlying design language and stainless-steel countertop draw clear lines to the brand’s heritage.

MAINTENANCE

STAINLESS STEEL WORKTOP

Keep stainless steel clean and dry. Stainless steel may be permanently stained if water, fat or cleaning products are not removed relatively quickly. Use warm water with a mild detergent and a soft sponge or lint-free cleaning cloth for daily or regular cleaning. We recommend using the Vipp oil can for care and protection of steel surfaces.

ANODIZED SURFACES

Keep anodized surfaces clean and dry. Use a lint-free cleaning cloth or a soft brush with warm water and a mild detergent. This applies to both smooth and rough surfaces.

SILICONE

We recommend cleaning the silicone mats in the washing machine at a maximum of 95°C. Make sure to thoroughly dry off the mats before placing them back in the drawers.

TEST & SUSTAINABILITY

All cabinets comply with TSCA and CARB regulations, ensuring strict and careful handling of production, particularly regarding formaldehyde, which is commonly used alongside melamine. This compliance ensures not only the health of our clients but also of the workers involved in production at our factory.

The kitchen has undergone extensive testing to ensure its durability and longevity under everyday usage. It has been tested to withstand prolonged use and durability. Additionally, various tests have been conducted to evaluate the kitchen’s overall strength. Our commitment to quality assurance means that every aspect of our products is carefully examined, providing customers with confidence that their kitchen will stand the test of time.
